Our Story

Datamars Livestock Africa

Datamars Livestock has supported farmers for over 50 years, turning animal data into smarter, more efficient decisions. Our technology provides accurate insights to manage livestock performance, health, reproduction, & productivity.

Built tough & engineered for accuracy, our solutions are shaped by real on-farm experience. From identification to weighing, monitoring, & digital farm management, our connected products work seamlessly together.

Our digital platform keeps you closely connected to your animals, strengthening intuition & enabling precise, informed decisions that drive profitability & long-term sustainability.

***Better.
Together.***

Our *Ecosystem*

The Datamars Livestock ecosystem integrates identification, weighing, & data management into one workflow. Using EID tags, readers, load bars, scales & cloud software, it automatically captures accurate individual animal data. The result is a seamless, low-stress process that boosts productivity, improves traceability & supports smarter farm decisions.

Tru-Test

Industry-leading weighing technology delivering fast, accurate animal weights with automatic data capture during handling. This includes Load Bars, Scale Indicators & EID Scanners.

Software

Free* Cloud-connected Datamars Livestock platform providing real-time insights, performance monitoring and automated record-keeping. View & share your farm data with ease.

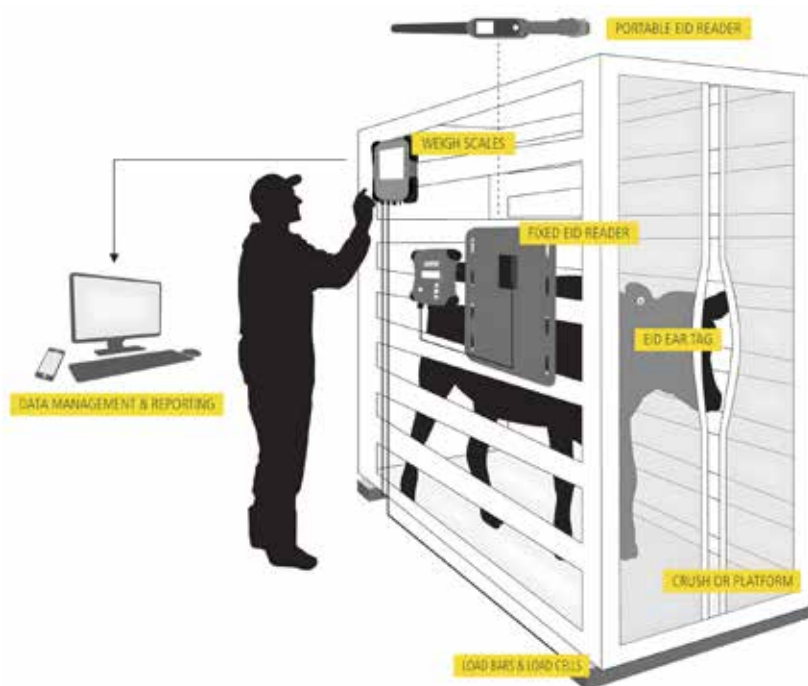

Hardware

Robust & complete cattle and sheep handling systems built for safe, low-stress, high-efficiency livestock flow. This includes handling crates, drafters, dips & Handling facilities.

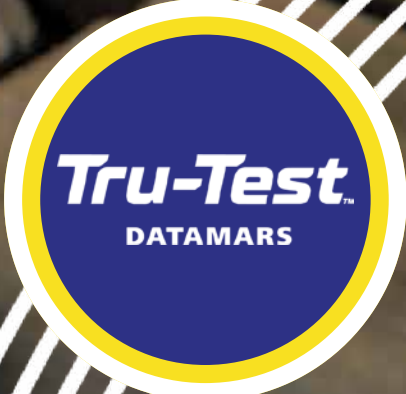

Z Tags

Durable visual and EID (electronic) livestock ear tags designed for long-term identification & reliable traceability in all farm conditions.

A complete system that works together.

Tru-Test Products

Tru-Test are grounded on accurate, reliable measurements to streamline activity & deliver timely, easy-to-understand intelligence to your fingertips.

Scale Indicators

S3 Scale Indicator

Our entry-level scale indicator.

- Easy to see weights
- Bluetooth connectivity
- Record weights & configure settings with Data Link mobile app
- Rugged and waterproof
- Rechargeable battery with 15 hour life

JR5000 Scale Indicator

Budget conscious scale indicator.

- Ideal for small/medium producers beginning to manage individual animals by weight and weight gain only
- Stock agents who need to quickly sort larger mobs and maintain records
- Make more informed decisions on how to manage individual animals
- Weigh stock in shortest time possible

Scale Indicators

XR5000 Scale Indicator

This is our most popular & advanced scale indicator.

The XR5000 speeds up weighing, reduces stress, records accurate data, cuts paperwork, and boosts overall productivity and profitability on the farm.

- Store up to 1 million records in 1000 weighing sessions and record up to 100 pieces of information for each individual animal
- Range of features available to calculate and visualise performance of individual animals or groups
- Up to 10-way drafting by using any pre-determined criteria
- Pre-Loaded common setup or save own favourites setups to easily switch between jobs
- Calculate target weights
- Track, apply and manage different treatments (e.g. type, dosage, vaccines, withholding periods, set alarms)

Comparison

Model	Integrated Bluetooth	Record Weights & ID Tags	Store Other Information	Drafting
 <p>S3</p>	✓	Unlimited on Data Link phone app	Designed to be integrated with third party management software	
 <p>JR5000</p>	✓	1 Million	1x note per animal	5-Way
 <p>XR5000</p>	✓	1 Million	Up to 100 traits	10-Way

Load Bars

MP600 Load Bars

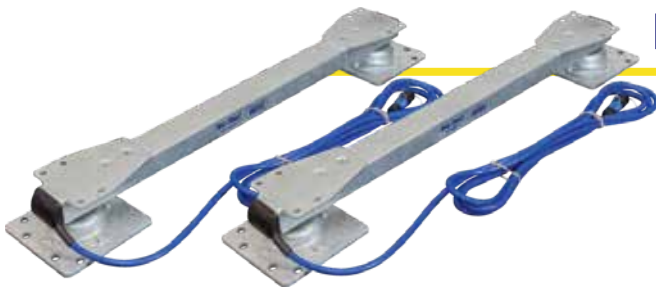

- CAPACITY 2,000kg
- Use under cattle platforms, sheep crates and wool presses
- 600mm

MP800 Load Bars

- CAPACITY 3,000kg
- Use under cattle platform, sheep crates and wool presses
- 800mm

HD5T Load Bars

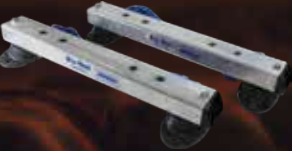

- CAPACITY 5,000kg
- Heavy duty load bar suitable under the heaviest of cattle crush
- 1115mm

Suspension Cell

- CAPACITY 250kg
- Ideal for mechanical scales conversions

Stick Readers

SRS2i Stick Reader

Budget conscious stick reader.

- Large sunlight viewable 2.7" colour LCD screen
- Fast tag reads with feedback through vibrating handle
- Quick access keys for simple navigation
- Wirelessly connect your weigh scale indicator using Bluetooth wireless technology
- Rugged and ergonomic design

- Easily download recorded information using your Windows computer or Apple iOS/Android smartphone

XRS2i Stick Reader

Our most popular & advanced stick reader

- Large sunlight viewable 2.7" colour LCD screen
- Alphanumeric keypad for flexible data entry
- Add and edit session names to keep track of each session
- Fast tag reads with feedback through vibrating handle
- Wirelessly connect your weigh scale indicator using Bluetooth wireless technology
- Capture animal information in up to 15 custom data fields
- Customisable alerts such as cull
- Rugged and ergonomic design

Antennas & EID Reader

XRP2i EID Reader

Our fixed EID reader, paired with either the small or large antenna.

- Reads all HDX and FDX tags.
- Record tags or send to your weigh scale indicator
- Plug & Play setup, with unique auto tuning functions
- Rugged design for the tough agricultural environment
- Easily download recorded information via PC or Android smartphone
- Wirelessly connect with your weigh scale indicator or smartphone using Bluetooth

Small Antenna

Ideal for sheep.

- Rugged design & easy to install
- Read range single antenna up to 0.7 m
- Antenna size: 410 x 340 x 10/33 mm

Large Antenna

Ideal for Cattle.

- Rugged design & easy to install
- Read range single antenna up to 1 m
- Antenna size: 873 x 603 x 15/38mm

Comparison

Model	Keypad	Memory	Bluetooth	Info
 SRS2i	Navigation Only	250 000	✓	Electronic ID, Visual Tag displayed
 XRS2i	Alphanumeric, Navigation	1 Million	✓	Electronic ID, Visual Tag, 15 custom fields
 Antenna & EID Reader	Daylight viewable screen display	20 000	✓	Record tags or send to weigh scale/ smartphone

Dairy Solutions

Tru-Test dairy solutions combine advanced heat and health monitoring, automated weighing, and smart data insights to help farmers optimise herd performance and make confident, real-time decisions.

Tru-Test™
DATAMARS

Health & Heat Detection

Active Tag

- Storage capacity if out of range of gateway: 10 days
- Battery life: Up to 5 years
- Weight: 25 g
- Tagger: Compatible with Z Tags male tags and No-Tear-Tagger™

Active Tag Collar

- Storage capacity if out of range of gateway: 10 days
- Battery life: Up to 8 years
- Weight: 850 g for fully assembled collar (includes belt, weight, and tag)

Farm Network Gateway

- Sends information from the Active Tag to Datamars Livestock software, giving you timely and reliable alerts.
- Retrieves data from your animals regularly and reliably.
- Ensures timely animal health and heat alerts.
- Virtually maintenance free.
- Powerful network can support any farm layout and size.
- Quick and easy to configure and install.
- Read range: 500 m radius

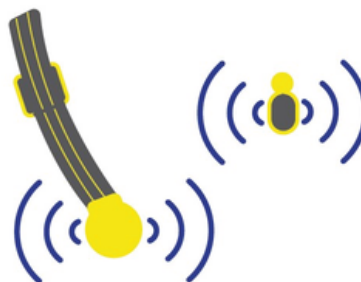

How Cow

Monitoring Works

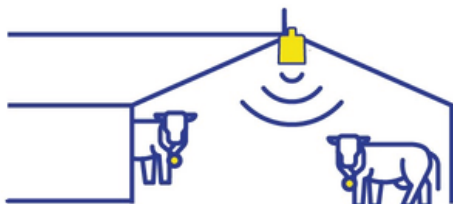

- 1** Five cow behaviors are tracked based on cow position (standing and laying down) and state (ruminating, feeding, resting).

- 2** Individual cow behavior is recorded 24/7 and can be linked to the animal's EID tag.

- 3** Data is automatically uploaded to Datamars Livestock Live via the gateway. The gateway range is 1,500 feet in all directions.

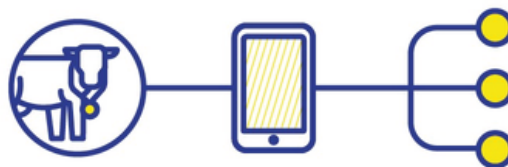

- 4** Automatic alerts to your phone or email will show you any time an animal has a heat or health event.

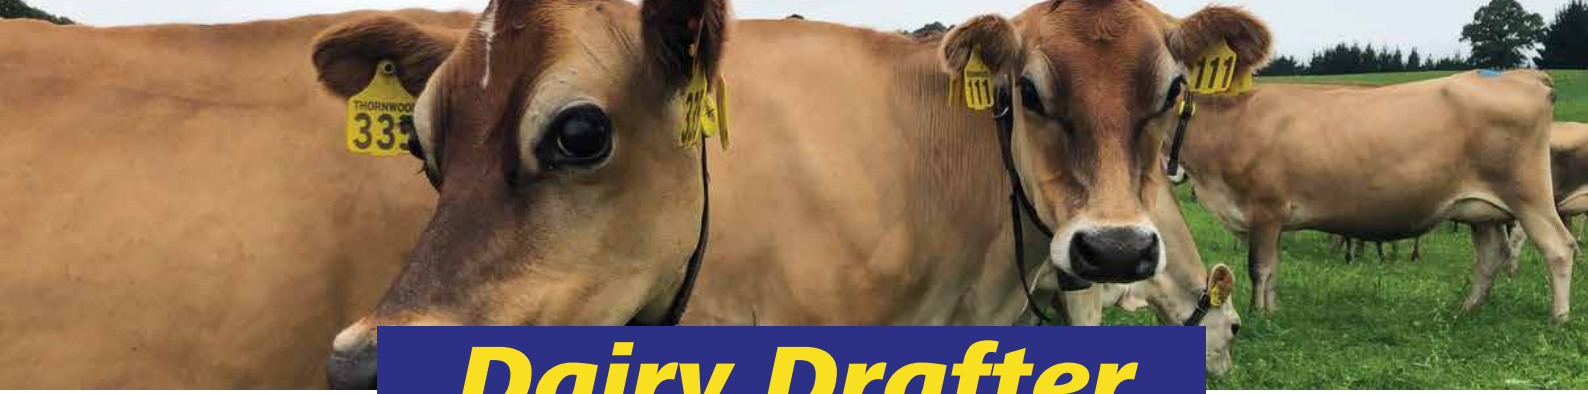

- 5** Access your data anytime from anywhere. Datamars Livestock Live is a cloud-based online program so your data is accessible from any device with an internet connection.

- 6** Easily share your data with herd software programs or third parties including veterinarians and consultants.

Dairy Drafter

3 Way Dairy Drafter

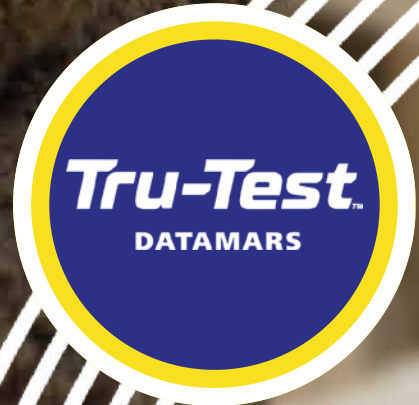

The Tru-Test Dairy Drafter is specifically designed for dairy applications where animals are regularly drafted for checking, treatment, insemination or special care.

The Dairy Drafter is installed in the exit race of the milking shed/parlour so that animals can be automatically drafted after milking. The system can be integrated with Datamars Livestock web and mobile apps and/or other farm management programs.

- 3 Drafting Gates move when an animal in the draft list is identified
- Saloon Gate controls the timing and flow of animals through the exit race
- Can use EID tags or Active Tags/Collars to identify & draft animals

Sheep Weighing Solutions

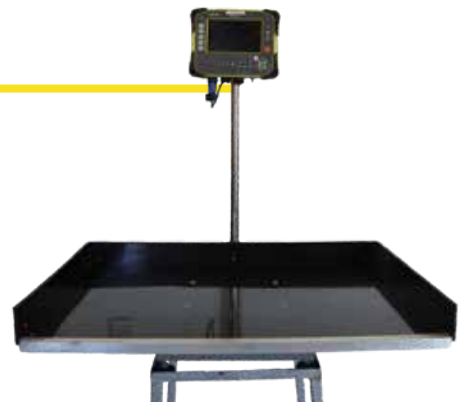

Our sheep weighing solutions deliver fast, accurate sorting, while ensuring reliable measurements are taken. They integrate seamlessly with Tru-Test indicators for efficient, data-driven flock management.

Manual Sheep Weighing Solutions

Wool Scale

- Effortlessly weigh wool
- Easily record wool weight & log quality test results to sheep with the XR5000 Scale indicator & XRS2i Stick Reader

Galvanised 3-Way Scale

Our entry-level 3-way drafter.

- Manual
- 3-Way Drafting
- 100% Galvanised
- Compatible with Tru-Test MP600 Load bars, Scale Indicators & Stick Readers

Aluminium 3-Way Scale

Our entry-level 3-way aluminium drafter.

- Manual
- 3-Way Drafting
- Aluminum frame with stainless steel platform
- Compatible with Tru-Test MP600 Load bars, Scale Indicators & Stick Readers
- Weighs approximately 60kg without Tru-Test products, thus easy transportable

Automatic Sheep Weighing Solutions

Semi Auto 3-Way Scale

Our budget friendly 3-way aluminium drafter.

- 3-Way Drafting
- Aluminum, frame with stainless steel platform
- Drafting according to multiple criteria
- Compatible with Tru-Test MP600 Load bars & drafting scale indicators (XR5000 or JR5000)

EID tag scanning is done manually with an XRS2i Stick Reader

Full Auto 3-Way Scale

Our most streamline 3-way aluminium drafter.

- 3-Way Drafting
- Aluminum, frame with stainless steel platform
- Drafting according to multiple criteria
- Compatible with Tru-Test MP600 Load bars & drafting scale indicators (XR5000 or JR5000)

EID tag scanning is done automatically with an XRP2i Reader & small antenna

Automatic Sheep Weighing Solutions

Stud Master

The Stud Master is our most advanced, high-throughput, automated sheep drafter that boosts on-farm efficiency by rapidly sorting animals using EID-linked criteria. It reduces labour, enhances accuracy, and creates calmer, safer handling. The Stud Master helps farmers manage flocks faster and improve overall farm productivity.

- Paired with Tru-Test XR5000 Scale Indicator, XRP2i EID Reader, Small Antenna, MP600 Load Bars
- Accurate hands free weighing & fully automatic drafting (up to 5-Ways)
- Drafting according to multiple criteria (e.g. weight, sex, breed, DOB, etc.)
- Draft up to 600 animals p/h
- Towable version available for easy transport

Pig Weighing Solutions

Our pig weighing solutions deliver fast, accurate weighing. They integrate seamlessly with Tru-Test indicators for efficient, data-driven management.

Manual Pig Weighing Solutions

Portable Pig Scale

Scale dropped & ready for weighing

The mobile pig weighing crate provides fast, efficient, and reliable weighing whenever required.

Its integrated wheel system lowers the crate securely into position for accurate measurement, while the slim design allows easy manoeuvring between pig pens for seamless operation.

- Paired with Tru-Test MP600 Load Bars and your scale indicator of choice
- Minimal & robust design
- Completely galvanised
- Accurate weighing
- Easily controllable enter & exit gates
- All terrain wheels for pig pen environments

Scale transformed for mobility

Automatic Pig Weighing Solutions

Swine Master

The Swine Master help to boost on-farm efficiency by rapidly weighing & sorting animals using EID-linked criteria. Swine Master helps farmers manage their animals faster and improve overall farm productivity.

- Paired with Tru-Test XR5000 Scale Indicator, XRP2i EID Reader, Small Antenna, MP600 Load Bars
- Accurate hands free weighing & fully automatic drafting (1 to 5-Ways)
- Drafting according to multiple criteria (e.g. weight, sex, breed, DOB, etc.)
- Draft up to 600 animals p/h
- Mobile version available for easy transport

Cattle Weighing Solutions

Our cattle weighing solutions deliver fast, accurate sorting, while ensuring reliable measurements are taken. They integrate seamlessly with Tru-Test indicators for efficient, data-driven herd management.

Tru-Test™
DATAMARS

Manual Cattle Weighing Solutions

Portable Calf Scale

The mobile calf weighing crate provides fast, efficient, and reliable weighing whenever required.

Its integrated wheel system lowers the crate securely into position for accurate measurement, while the slim design allows easy manoeuvring.

Scale dropped & ready for weighing

- Paired with Tru-Test MP600 Load Bars and your scale indicator of choice
- Minimal & robust design
- Completely galvanised
- Accurate weighing
- Easily controllable enter & exit gates
- All terrain wheels for farm environments

Scale transformed for mobility

Automatic cattle Weighing Solutions

3-Way Scale

Manual 3-way drafter available for a budget friendly option

- Paired with Tru-Test XR5000 Scale Indicator, XRP2i EID Reader, Large Antenna, MP600 Load Bars

- Drafting according to multiple criteria (e.g. weight, sex, breed, DOB, etc.)
- Accurate hands free weighing & fully automatic drafting
- Drafts animals in 3-ways

5-Way Scale

Our most advanced cattle drafter & scale

- Paired with True-Test XR5000 indicator, XRP2i EID reader, large antenna, MP600 load bars
- Drafting according to multiple criteria (e.g. weight, sex, breed, DOB, etc.)
- Accurate hands free weighing & fully automatic drafting
- Drafts animals in 5-ways

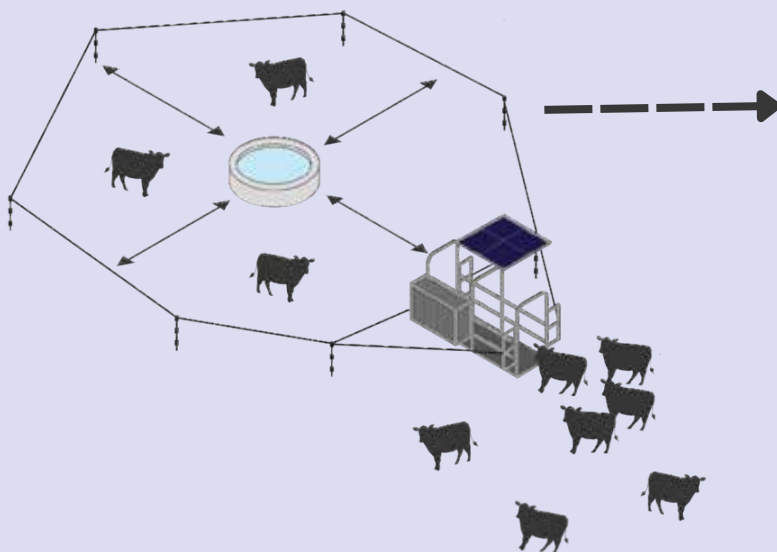

Walk-Over-Way

The Walk Over Way (WOW) is a world-class in-veid weighing solution.

Placed near a water source, or an attractant, livestock quickly adjust to weighing themselves daily by walking over or on the WOW structure.

Delivering accurate, real-time insight and data based on individual animal weights averages, the system is a combination of sophisticated, yet practical algorithms and robust hardware. Daily weighing data is transformed into clearly presented graphs and reports via the Datamars Livestock Live application, which can be accessed on your smart device from anywhere in the world.

Walk-Over-Way

WOW

Scale dropped & ready for weighing

- Track animal against weights
- Improve pasture management & animal productivity
- Instantly share the latest data with third parties
- Improve herd management by identifying top & bottom performers
- Gain insight into weight trends & average daily gains for a group
- Set drafting criteria remotely and view up to-date draft numbers
- New cage on the Flexi 4000C for improved data integrity & accuracy
- Manage supplement feeding regimes with accurate data & insights
- Access your data from anywhere in the world, using Datamars Livestock Live
- Cellular and satellite connection options to suit any location

Sheep Handling Solutions

Our efficient sheep handling ensures fast, low-stress animal handling & treatment.

Sheep Handling Solutions

Lamb Master

- Machine for earmarking, tagging, tail docking, vaccinating, castrating & drenching lambs of all sizes
- Lambs are released on their feet, minimising the risk of injury
- The V-shaped chute allows you to handle your lambs fast with minimal effort
- 1 meter extension available

Spray Dip

- High pressure jets covering the top, sides & underneath so you get full-body coverage of the sheep for maximum results.
- Plastic base catches water to be recycled back into sprays, which saves water & money
- Is a faster, cleaner, & more effective alternative to traditional sheep dipping
- Uses strategically positioned high-pressure nozzles to reach problem areas
- Multiple pump options or no pump.
- Can be used as a foot dip as well.
- Fits on the back of a bakkie or mobile version available

Sheep Handling Solutions

Feed Master

The Sheep Feeder Bin is an innovative research tool designed to help you better understand and manage your flock. Each feeder automatically records data from individual sheep, including eating habits and feed efficiency. By analysing this information, you can easily compare animals based on their feed conversion rates and identify your most efficient performers, as well as gain insight into various feed mixtures. With these insights, you can make more informed breeding decisions.

- Raised lip and deep trough design minimise spillage
- Weather-Resistant & Durable
- Safe for Sheep thanks to smooth edges and rounded design that prevent injury
- Easy to Move & Clean Lightweight yet solid
- Heavy-duty galvanised steel
- Deep trough capacity
- Anti-waste lip design
- Safe for animals
- Sturdy base frame
- Portable & lightweight
- Easy to clean

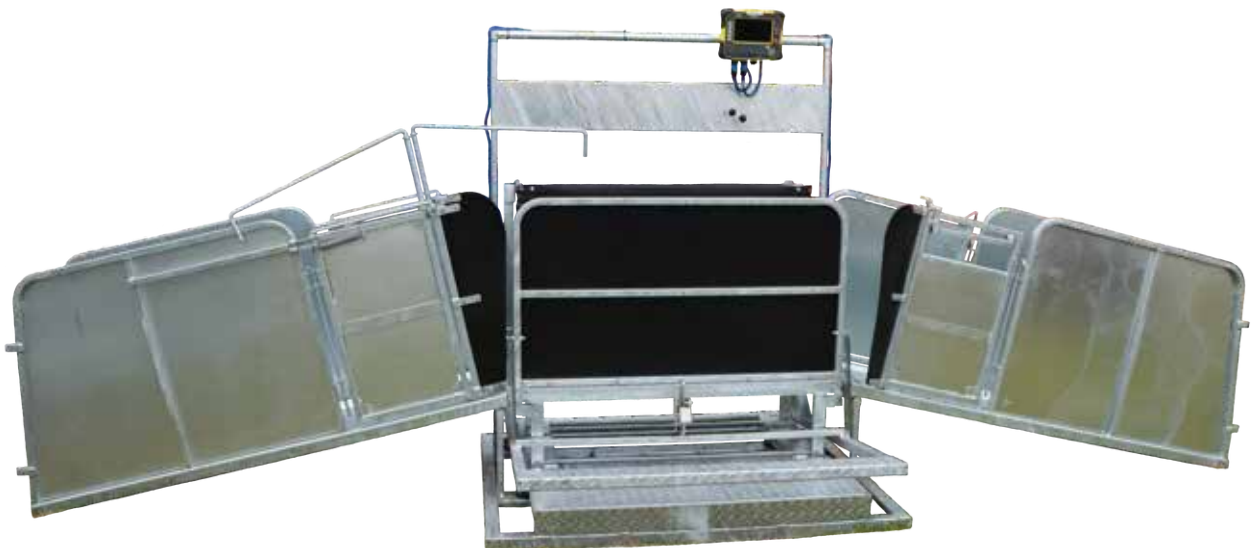

Sheep Handling Solutions

Clamp Master

The Clamp Master is a streamlined workstation designed to handle multiple sheep efficiently in a short amount of time. It enables you to weigh, restrain, treat, inspect, and draft sheep. All in one convenient setup.

- Adjustable Clamp Width which accommodates all sizes of sheep
- Handler foot control with lock function (keeps hands free for treatments)
- Non-Slip Floor secure footing to keep sheep steady during work
- Mobile & Versatile & can easily integrate into existing race systems
- Manual 3 Way drafting
- Cut down labour costs by reducing the number of handlers needed
- Increase throughput and productivity during routine work.
- Improve animal welfare with low-stress handling.
- Integration with Tru-Test weighing and EID reader system available

Sheep Handling Solutions

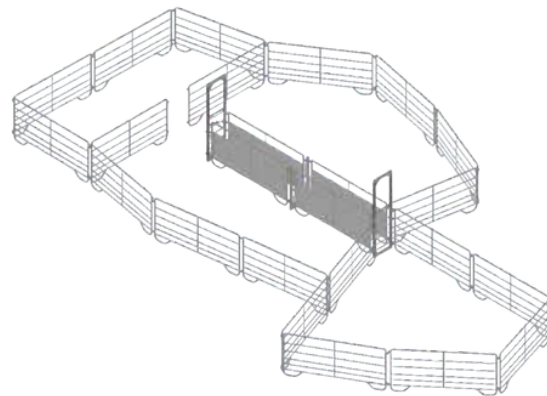

Mobile Gates

Our mobile gates on a trailer are designed to give farmers a fast, flexible & reliable way to set up temporary handling areas for sheep anywhere on the farm. Built for convenience & durability, this system allow you to create safe flow-through raceways, sorting areas or temporary kraals without needing permanent structures.

Gates with added 3-Way Sheep Drafter as example

- Fully mobile handling solution mounted on trailer for easy transport
- Allows quick setup of temporary kraals, raceways or drafting lanes
- Designed to withstand daily farm use & harsh African conditions
- Compatible with wider Datamars systems, enabling the integration of weighing or EID technology when needed

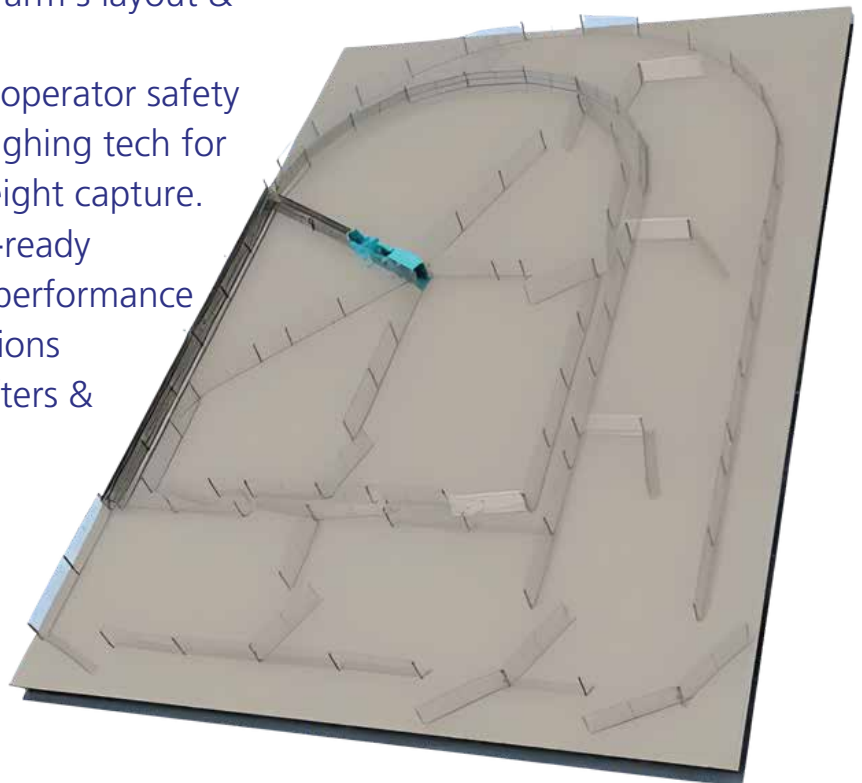

Handling Facilities

Datamars Livestock Africa designs, builds and installs customised sheep & goat handling facilities that help farmers improve animal flow, safety and operational efficiency. Every system is engineered to match the layout and needs of the farm, combining strong, durable construction with our smart technology (such as RFID identification and integrated weighing with Tru-Test). Our solutions streamline livestock management while supporting accurate data capture, enhanced traceability and low-stress handling.

- Custom-designed to fit farm's layout & livestock needs
- Improves animal flow & operator safety
- Works with Tru-Test weighing tech for accurate, automated weight capture.
- Built with durable, farm-ready materials for long-term performance
- Provides full sheep solutions including raceways, drafters & loading ramps
- Enables automatic data collection via connected indicators & cloud software

Cattle Handling Solutions

Our efficient cattle handling ensures fast, low-stress animal handling & treatment.

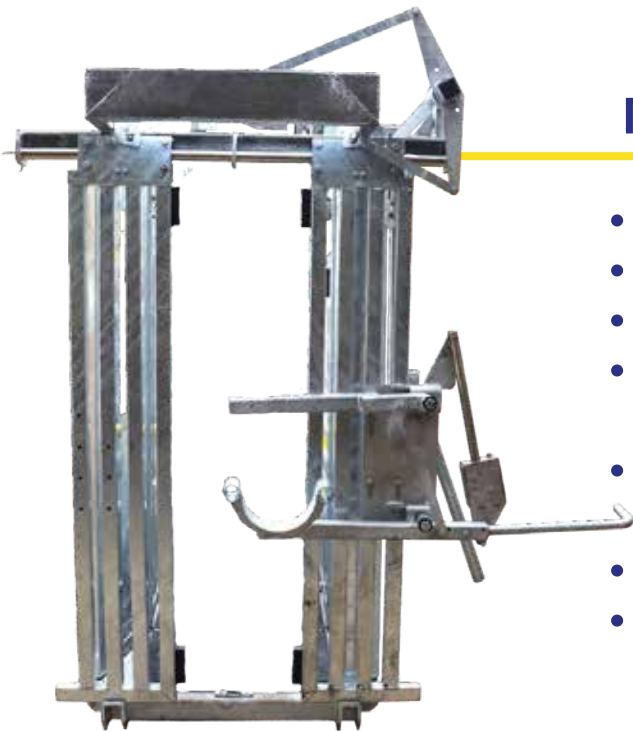

Cattle

Handling Solutions

V-Neck Clamp

- Fully Galvanised
- V-Shaped clamp ensures seamless captures between animals
- Straight pipe ensures no pressure is places on animals artery to avoid animals passing out
- Adjustable for calf & bull use

Neck & Head Clamp

- Includes a body & neck clamp
- Three access doors on each side
- Hoof access doors on each side
- Low-stress handling results in healthier livestock and fewer injuries to people
- Minimising the potential risk of injury to animals
- Compatible with Tru-Test HD5T load bars
- Fully galvanised

Cattle Handling Solutions

Body Crush

Our entry-level cattle clamp.

- Includes a body & neck clamp
- Three access doors on each side
- Hoof access doors on each side
- Low-stress handling results in healthier livestock and fewer injuries to people
- Minimising the potential risk of injury to animals
- Compatible with Tru-Test HD5T load bars
- Fully galvanised

Cattle

Handling Solutions

Cattle Master 90

Our budget friendly cattle clamp.

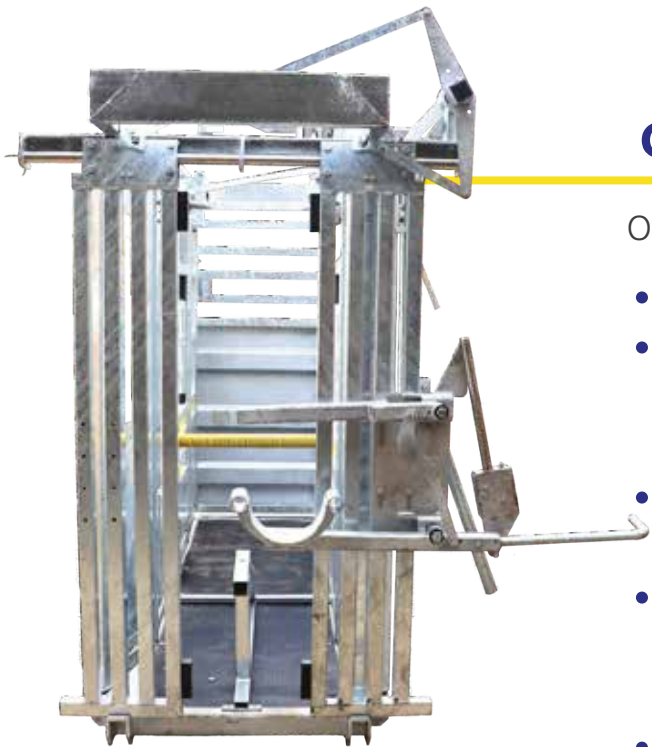

- Includes a body, neck & head clamp
- Reversible rolling door that may be opened & closed from either side of your handling system
- Rubber flooring provides excellent grip for livestock
- Adjustable to accommodate big & small bulls & calves
- Adjustable width via enclosing sides with a locking mechanism to keep it in place
- Head lock mechanism that provides the handler with up-close access to the animal's head
- Various access doors on either side
- Sternum bar to keep the cattle standing
- Compatible with Tru-Test HD5T load bars
- Fully Galvanised

Cattle

Handling Solutions

Cattle Master 110

Our most advanced cattle clamp.

- Includes a body, neck & head clamp
- Reversible rolling door that may be opened & closed from either side of your handling system
- Rubber flooring provides excellent grip for livestock
- Adjustable width via enclosing sides with a locking mechanism to keep it in place
- Various access doors on either side
- Adjustable to accommodate big & small bulls & calves
- Head lock mechanism that provides the handler with up-close access to the animal's head
- Sternum bar to keep the cattle standing
- Veterinarian access door for stress free AI
- Fully Galvanised
- Compatible with Tru-Test HD5T load bars

Cattle

Handling Solutions

Big Horn Master

For big horn cattle breeds

- Fully galvanised
 - Compatible with Tru-Test MP600 Load Bars & scale indicators
 - Panel height designed to align with cattle growth for improved safety & control
 - Ratchet-free locking mechanism for reduced noise & smoother operation
 - No-gap locking mechanisms to prevent animal injury
-
- Chute closes down to 400 mm to safely secure various cattle sizes
 - H-Clamp opens to 1000 mm & closes to 50 mm for versatile animal handling
 - Integrated vet gate with kick door to protect the operator
 - Chin scoop for secure head stabilisation
 - Rubber-coated handles for improved operator comfort
 - Single weave point at the H-Clamp for firm yet gentle restraining
 - Easy-access doors along the full animal body for efficient handling regardless of size

Spray Dip

Our cattle spray dip provides a time- and cost-effective solution for treating your animals efficiently.

- Makes cattle treatment faster, easier & more cost-effective with smooth, controlled application
- Connects to water pump to circulate the water + dose mix to save on water & money
- Provides precise dosing to minimise product waste
- Offers comfortable handling during long work sessions with textured grip for animals to walk
- Adapts to various spray techniques with six interchangeable nozzle configurations
- Enhances productivity, welfare and sustainability across livestock operations

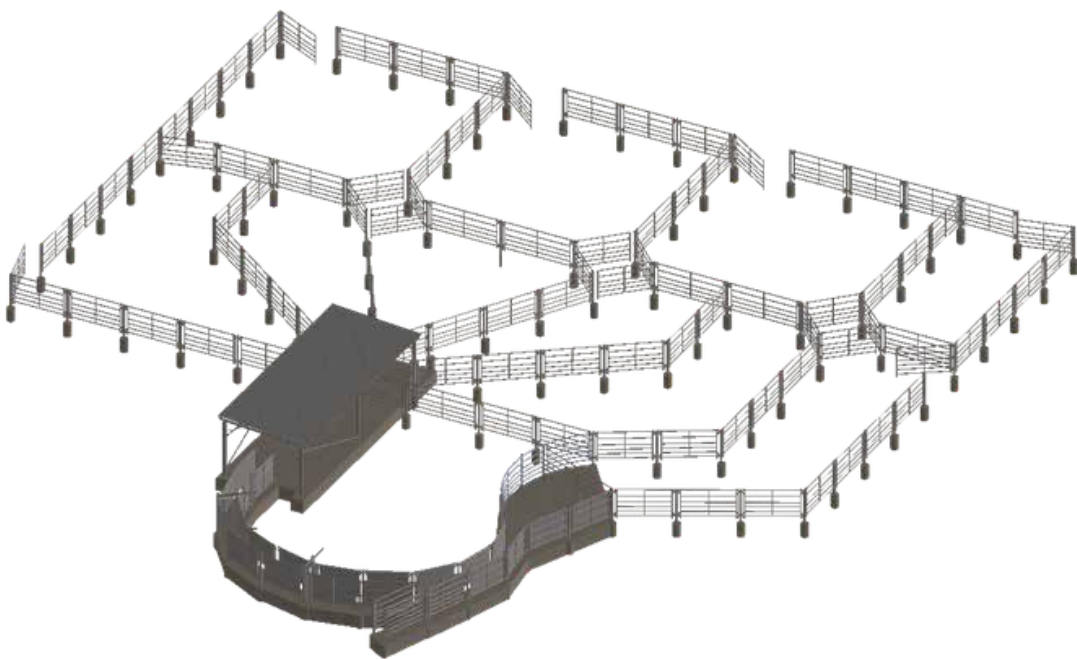

Cattle

Handling Solutions

Handling Facilities

Datamars Livestock Africa designs, builds & installs customised cattle handling facilities that help farmers improve animal flow, safety & operational efficiency. Every system is engineered to match the layout and needs of the farm, combining strong, durable construction with smart technology such as RFID identification and integrated weighing with Tru-Test. Our solutions streamline livestock management while supporting accurate data capture, enhanced traceability and low-stress handling.

- Custom-designed to fit farm's layout & livestock needs
- Improves animal flow and operator safety
- Works with Tru-Test weighing tech for accurate, automated weight capture
- Enables automatic data collection via connected indicators & cloud software
- Built with durable, farm-ready materials for long-term performance
- Reduces stress for animals and operators with low-stress design principles

Our Z-Tag Collection

Our tags are built for farmers who value efficiency, durability, and reliable data in the field.

Our **Tags**

Assisting the farmer with herd management, record-keeping & traceability through identification of individual animals.

- ✓ Innovative design for improved retention.
- ✓ Exceptional quality, strength and durability.
- ✓ Swing and rotate freely.
- ✓ Sheep range: also suitable for goats, pigs and small game.
- ✓ Cattle range: also suitable for large game, ostriches and pigs.

Our Sheep Range

Tag Name: Mini Flag Female
Dimensions: 40 mm Length, 40 mm Width.
Suitable Applicator: Universal applicator.

Tag Name: Mini Flag Male
Dimensions: 40 mm Length, 40 mm Width.
Suitable Applicator: Universal applicator.

Tag Name: SF
Dimensions: 44 mm Diameter, 15 mm Width.
Suitable Applicator: Universal applicator; 2-Piece applicator

Tag Name: SM
Dimensions: 44 mm Diameter, 15 mm Width.
Suitable Applicator: Universal applicator; 2-Piece applicator

Our Cattle Range

Tag Name: M4
Dimensions: 104mm Length, 77mm Width.
Suitable Applicator: Universal applicator; 2-Piece applicator.

Tag Name: M4
Dimensions: 104mm Length, 77mm Width.
Suitable Applicator: Universal applicator; 2-Piece applicator.

Tag Name: F3
Dimensions: 80 mm Length, 63 mm Width
Suitable Applicator: Universal applicator; 2-Piece applicator.

Tag Name: M3
Dimensions: 80 mm Length, 63 mm Width
Suitable Applicator: Universal applicator; 2-Piece applicator.

Our Cattle Range

Tag Name: F2
Dimensions: 63 mm Length, 56 mm Width
Suitable Applicator: Universal applicator; 2-Piece applicator.

Tag Name: M2
Dimensions: 63 mm Length, 56 mm Width
Suitable Applicator: Universal applicator; 2-Piece applicator.

Tag Name: F1
Dimensions: Diameter - 30 mm.
Suitable Applicator: Universal applicator; 2-Piece applicator.

Tag Name: M1 Universal
Dimensions: Diameter - 30 mm.
Suitable Applicator: Universal applicator; 2-Piece applicator.
Additional Specifications: Use with visual & EID female tags in Z-Tag range.

Our
EID Range

Tag Name: FDX Open 25 mm
Dimensions: Diameter - 25 mm.
Suitable Applicator: Universal applicator.
Used for: Sheep, Goats

Tag Name: FDX Open 30 mm
Dimensions: Diameter - 30 mm.
Suitable Applicator: Universal applicator.
Used for: Cattle

Tag Name: HDX Open 30 mm
Dimensions: Diameter - 30 mm.
Suitable Applicator: Universal applicator.
Used for: Dairy

Tag Name: FDX Closed 30 mm
Dimensions: Diameter - 30 mm.
Suitable Applicator: Universal applicator.
Additional Specifications: Tamper-proof; ICAR approved.
Used for: Cattle

Our EID Range

Tag Name: HDX Closed 30 mm
Dimensions: Diameter - 30 mm.
Suitable Applicator: Universal applicator.
Additional Specifications: Tamper-proof; ICAR approved.
Used for: Dairy

Tag Name: M1 Universal
Dimensions: Diameter - 30 mm.
Suitable Applicator: Universal applicator; 2-Piece applicator.
Additional Specifications: Use with visual & EID female tags in Z-Tag range.

Tag Name: M1 Short
Dimensions: Diameter - 25 mm.
Suitable Applicator: Universal applicator.
Additional Specifications: For use with visual and EID female tags in Sheep Range.

Our Equipment

Tag Remover

- For use on all tags in Z-Tag range.
- Dual razor blade design for quick removal of tags.
- Easy to locate fluorescent orange handle.

Marker Pen

- Thick and fine tip
- 4 year guarantee when used with Z-Tag.
- Heavy duty, quick drying.
- Marks about 100x tags with two coats.

Z2 No Tear 2-piece Applicator

- For use on Z-Tags range
- Automatically retracts after application for quick application, reduced risk of tearing and improved retention
- Ergonomic for use from front or back of animal

Universal Applicator

- For use on all tags in Z-Tag range
- Replacement pins available. Rugged, durable design

Our Cloud Software

Our smart cloud-based software puts all data to drive performance, profitability and sustainability at your fingertips.

Our

Cloud Software

Our software solutions help you make better-informed decisions on your farm, every day, saving time & reducing stress.

On-farm and online, our digital platform connects you with information about your livestock. Bolster your intuition and make precise, informed decisions that promote animal health, enable precision animal management and improve protein production.

- ✓ **Seamlessly integrate your systems**
- ✓ **Access your data from anywhere**
- ✓ **Get real insights in real time**
- ✓ **Make better-informed decisions**

Weighing insights

Reviewing weighing data gives you insights into both group & individual animal performance, helping you to keep track of animal data all in one place.
